🎯 CAREER OBJECTIVE

To find an entry level position within a company involved with technology so that I can surround myself with an environment that promotes growth, learning and a pursuit of new mastery for my future self. My goal is to enter such an environment armed with my passion for learning and an ability to excel at all things I apply myself to, while hopefully making a positive impact on those around me in the process.

💼 EXPERIENCE

Full Stack Coding Student

UCSD Extension Full Stack Coding Bootcamp / May 2019 - August 2019

In the summer of 2019 I attended the full time bootcamp at the UCSD Extension where I was exposed to a wide variety of skills with a focus on JavaScript and culminating in a final project using the MERN stack. The course lasted 12 weeks and I spent an average of 30 hours a week on campus receiving direct instruction, along with 30 hours of additional time spent while at home in the evenings. During this time I was also working 20-30 hours each weekend on location with TKS (see below) to provide for my household.

Partner, Quality Assurance

The Kebab Shop (TKS), San Diego, CA++ / 09/2007 - Current

I have been in a management role with The Kebab Shop for well over 11 years, leading up to my current position as an acting partner with a wide range of responsibilities. In the past year I have stepped down from taking as active of a role in order to pursue a career in technology, but I am still eager to see where the company goes and am honored to continue being involved. Most recently I oversaw the orientation and training for the launch of our newest location in Austin, Texas. My job with TKS has seen me wearing many hats over the years, but I will list the most prominent of my achievements for reference here.

- Developed countless systems for operations that persist to this day.
- Personally selected and trained hundreds of applicants, a handful of whom now still hold leadership positions within the company even many years later.
- Assisted in the majority of openings out of the 15 currently operating locations in regards to everything from evaluating proper construction, overseeing onboarding and spearheading training of new staff.
- Directly oversaw operations of several stores simultaneously while also remaining a point of contact for all locations regarding any staff issues or other needs of in-store management.
- Was the primary correspondent for all customer feedback and outreach through channels such as Yelp, Google Maps and also direct contact to any stores via email.
- This list goes on. If it would affect the overall quality of the restaurants, it would fall under my umbrella and I would react accordingly to ensure a positive outcome.
